## **DETAILED ACTION**

### ***Continued Examination Under 37 CFR 1.114***

A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submissions filed on 8/1/2011 and 8/30/2011 have been entered.

### ***Allowable Subject Matter***

Claims 22-40 are allowed.

Claims 22-40 disclose stereoscopic/multi-view three-dimensional video processing systems and methods that include encoding/decoding video and multiplexing/demultiplexing video packets according to view point and display discrimination information the viewpoint information including indicating the number of viewpoints in the video stream and the display discrimination information includes a display mode selected by a user from a set of display modes prior to the display discrimination information being included in the video stream, finally the claims require that the set of display modes includes a two dimensional mode, a stereoscopic mode and a multi-view mode.

The closest art is Oshima in view of Rodriguez and Liu. Oshima discloses a stereoscopic video system which includes encoding and decoding of video, multiplexing

and demultiplexing video from an optical disc, where the optical disc includes information indicating available display modes. Rodriguez generally discloses video-on-demand streaming in which a user may select a display size, prior to video transmission, and display size indications will be included in the transmitted video stream. Liu discloses a multi-view video system that includes a flag indicating the number of viewpoints in the video stream. However, none of the prior art discloses a system as claimed that includes display discrimination information including a display mode selected by a user from a set of display modes prior to the inclusion of the display discrimination information in a multiplexed stream, wherein the set includes a two dimensional a stereoscopic and a multi-view display mode.

***Examiner's Note***

Applicant filed request for continued examination under 37 CFR 1.114 in order to submit prior art WO 00/14966 (Moeller et al) in compliance with 37 CFR 1.56(a)(1) which was identified as background art in an a Notification of Reason for Rejection received from the Japanese Patent Office. The applicant as additionally submitted JP 10-023427 for consideration.

The examiner has examined the submitted prior art and maintains the allowance of claims 22-40 for the reasons stated above. WO 00/14966 teaches details of multiplexing video and audio data. JP 10-023427 teaches multiplexing several video objects of the same video sequence together with weighting parameters. Neither of the submitted prior arts teach including display discrimination information including a display

mode selected by a user from a set of display modes prior to the inclusion of the display discrimination information in a multiplexed stream, wherein the set includes a two dimensional a stereoscopic and a multi-view display mode which is required by the claims of the instant application as noted above.
